Enclosed cartridge for use with
INTELLIVISION® Master Component.

No. JZ01-SE

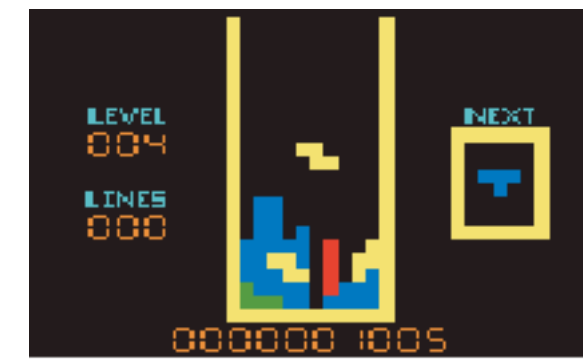

FOR COLOR TV VIEWING ONLY.

No. JZ01-SE

This package contains one game cartridge, two controller overlays and playing instructions.

4-TRIS

Put your puzzle solving skills to the test with this exciting game of skill and coordination! Place multi-colored bricks as they fall into the well, while trying to fill rows of bricks. Fill a row and it disappears, making room for more. Leave a "hole" and that row remains until you can fill it. When the well is full, you LOSE! How long can YOU go before filling the well?

Multi-colored bricks fall into the well. You must place these bricks in order to fill the rows. Don't fill the well!

- Get points for clearing rows. Get additional bonuses for clearing multiple rows at a time.
- Clear lines whenever possible to keep the well empty. Or, build up rows to try for the elusive **4-TRIS!**
